2024

Percentage: 61

Boys' Hight School & College, Prayagraj

High School (Class X)

2022

Percentage: 80

EXPERIENCE

HackerRank Student Chapter (Volunteer)

2026 – Present

- Assisting in the organization and logistics of community-driven tech events, workshops, and developer meetups.
- Engaging with the regional developer ecosystem to facilitate knowledge sharing on Advance technologies and open-source contributions

Pragatantra

2025 Semi-Finalist

- Collaborated with a multidisciplinary team to develop policy-driven solutions for AI-enabled sustainable cities, teamwork, strengthening leadership, and strategic problem-solving in a national-level competition.
- Expanded expertise in public policy, civic leadership, and community-focused innovation by contributing to technology-driven solutions addressing real-world urban and social challenges.

PERSONAL PROJECTS

SAGE – AI Micro-Learning Mobile & Web Application | React Native & React, Vite, Node.js

2026

- Designed a learning app that converts idle screen time into short AI-powered knowledge bites.
- Implemented scenario-based quizzes and voice playback for interactive learning.

CogniPath – AI Gamified Adaptive Learning Platform | React, TypeScript, Gemini AI

2026

- Developed a web platform that generates personalized roadmaps from any book, web link, or topic using AI.

PathEd – AI Career Guidance & Learning Platform | React, Vite, Node.js

2026 (Expected)

- Built an interactive roadmap system for students to track career skill progress.
- Developed recruiter dashboards to filter candidates based on real-time skill completion.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, Java, HTML, CSS

Frameworks & Libraries: React, React Native, Node.js, Tailwind CSS

Tools & Platforms: Git, GitHub, VS Code, AntiGravity, NPM

Core Areas: Data Structures & Algorithms, AI Integration, UI/UX Design, Edtech Development

CERTIFICATIONS & ACHIEVEMENTS

- Master Class in Artificial Intelligence – Novitech (2026)
- Advanced AI Productivity & Tooling – Be10x (2025)
- Python for Rapid Prototyping – Be10x (2025)
