## EDUCATION

|                                                         |                      |
|---------------------------------------------------------|----------------------|
| United Institute of Technology, Prayagraj               | 2024 – 2028          |
| B.Tech in Computer Science & Engineering (Data Science) | SGPA: 7.8 (4th Sem.) |
| Boys' High School & College, Prayagraj                  | 2024                 |
| Intermediate (Class XII)                                | Percentage: 61%      |
| Boys' High School & College, Prayagraj                  | 2022                 |
| High School (Class X)                                   | Percentage: 80%      |

## EXPERIENCE & LEADERSHIP

|                                                                                                                                                                                                                                                                                                                                                                                             |                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| HackerRank Student Chapter – Volunteer                                                                                                                                                                                                                                                                                                                                                      | 2026 – Present |
| <ul style="list-style-type: none"><li>Coordinated technical workshops, coding events, and developer meetups to promote AI, data science, and full-stack development. EdTech features among 500+ student participants.</li><li>Collaborated with core members to build engaging learning initiatives and drive open-source contributions.</li></ul>                                          |                |
| Pragatantra 2025 – Semi-Finalist                                                                                                                                                                                                                                                                                                                                                            | 2025           |
| <ul style="list-style-type: none"><li>Collaborated with a multidisciplinary team to design policy-driven, AI-enabled solutions for sustainable cities.</li><li>Strengthened leadership, strategic thinking, and problem-solving skills while addressing real-world urban and social challenges. Gained exposure to public policy, civic innovation, and technology-driven impact.</li></ul> |                |

## PROJECTS

|                                                                                                                                                                                                                                                                                             |                                               |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| SAGE – AI Micro-Learning Mobile & Web Application                                                                                                                                                                                                                                           | React Native, React, Vite, Node.js, Gemini AI |
| <ul style="list-style-type: none"><li>Developed an AI-powered micro-learning platform that converts idle screen time into personalized learning bites.</li><li>Implemented scenario-based quizzes, spaced repetition, and voice playback to enhance learner engagement.</li></ul>           |                                               |
| CogniPath – AI Gamified Adaptive Learning Platform                                                                                                                                                                                                                                          | React, TypeScript, Gemini AI, Node.js         |
| <ul style="list-style-type: none"><li>Built an adaptive learning platform that generates personalized roadmaps from books, URLs, and topics using LLMs and prompt engineering.</li><li>Designed gamified learning paths with progress tracking, quizzes, and AI-powered insights.</li></ul> |                                               |
| PathEd – AI Career Guidance & Learning Platform (In Progress)                                                                                                                                                                                                                               | React, Vite, Node.js, MongoDB                 |
| <ul style="list-style-type: none"><li>Building an AI-driven career guidance platform with interactive roadmaps and skill trackers for students.</li><li>Developing recruiter dashboards to filter candidates based on real-time skill completion and proficiency.</li></ul>                 |                                               |

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, TypeScript, Java, C, HTML, CSS  
**Frameworks & Libraries:** React, React Native, Node.js, Express.js, Tailwind CSS  
**AI & ML:** Gemini AI, Prompt Engineering, LLMs, Machine Learning (Basics), NLP (Basics)  
**Databases:** MongoDB, Firebase (Basics), SupaBase  
**Tools & Platforms:** Git, GitHub, VS Code, Postman, NPM, Vite  
**Core Competencies:** Data Structures & Algorithms, Full-Stack Development, REST APIs, AI Integration, Educational Technology, Problem Solving, Agile Collaboration

## CERTIFICATIONS

- Master Class in Artificial Intelligence – Novitech (2026)
- Advanced AI Productivity & Tooling – Be10x (2025)
- Python for Rapid Prototyping – Be10x (2025)

## RESEARCH INTERESTS

- Large Language Models and Prompt Engineering
- Adaptive Learning Systems
- AI for Education and Learning Analytics
- Educational Technology and Human-AI Interaction

## ACHIEVEMENTS

- Semi-Finalist – Pragatantra 2025 (National Level)
- Active contributor in coding communities and open-source projects
- Consistently enhancing AI, Data Science, and Full-Stack Development skills through hands-on projects and certifications.
